# Cages

Stainless steel cages are widely used for housing various animals, especially in professional and clinical settings such as veterinary clinics, research laboratories, animal shelters, and boarding facilities. Their popularity stems from their durability, ease of cleaning, and resistance to rust and corrosion. Our stainless steel Cages as the best material with high quality materials and unique design, keep patients well accommodated and comfortable. Modular and available in various sizes and configurations, the cages can be adapted for each clinic. Customization is available. cages are made entirely of SUS304 grade brushed stainless steel to guarantee durability, easy cleaning and hygiene.

Stainless steel cages, their longevity, ease of maintenance, and hygienic properties make them an excellent investment for facilities that prioritize animal health and safety. Whether for clinical, commercial, or specialized use, stainless steel cages can be customized to meet the specific needs of the animals and the facility, ensuring a safe, comfortable, and sanitary environment.

## ► Stainless Steel Cat Condos (Cat Suite)

2 way locking  
CAT FLAP

CS-999

The Cat Condo is a stainless steel unit that includes a shelf and a pass through to side litter box area. Unit is constructed of SUS304 stainless steel and includes two heavy duty doors with one hand latch system. The doors have simple and secure latches, large transparent windows with space to ensure adequate ventilation without compromising the safety of the animal. PVC partitions, which allows to use the lower and upper parts as a single shelter.

### Features:

- Constructed of SUS304 grade brushed stainless steel
- Easy cleaning and disinfecting of the cat condo
- Resting shelves provide more space inside the cat condo
- Litter box shield
- Easy-clean hand-welded and polished radius corners don't catch on fur
- Side-to-side pass-thru from cat condo area to litter area by lockable cat flap
- Latch can be pad locked for secure containment
- Available with tempered glass doors on the cat condo

## ► Stainless Steel Dog Cages

DC-990

Designed for a variety of environments, from animal shelters to pet resorts to boarding facilities to animal hospitals. Each cage includes a removable floor grate, slide-out floor tray and a secure latching door. Removable sub floor elevates patient to keep feet out of liquids. Waste material drains into a removable collection tray and allows your staff to clean without removing the patient. Safety engineered wire spacing at the latches and floor grates prevent animal from getting caught, stuck, dirty from waste, or opening the doors.

### Features:

- Made of durable SUS304 type stainless steel
- Specially engineered and designed for safety, strength, durability and longevity
- All welds are ground and polished
- Stainless steel doors are designed with lift off hinges
- Perforated sub-floor allows fluids to drain
- Available in small, medium and large sizes (optional sizes)
