Surgery Table

Our surgery tables offer features and options designed with you in mind. Our surgery tables with features that save you time, in turn making your staff more efficient and productive.

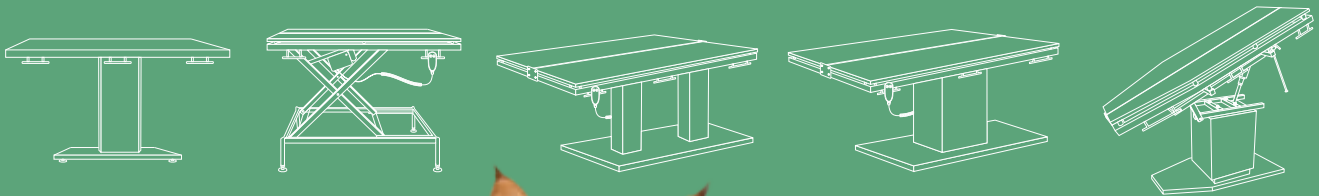

Surgery table are stainless steel construction, made from SUS304 grade brushed stainless steel. The ideal material for a sterile environment, easy to use and resistant to corrosion.

The tables are designed for the easy adjustment of patients position, save your time, eliminating any unnecessary bending or stretching.

With a choice of flat top surgical tables or v-top surgical tables, electric column or X-shaped structure, you are sure to find a suitable veterinary surgical table for your needs.

V-Top Series Surgery Table allows for the correct positioning of patient during surgery and removes the need for thoracic positions.

The regulation of the tops flaps to help maintaining the animal in the desired position.

2024 Catalog

V Top Series

For procedures requiring precise animal positioning, choose a "V" style table. Featuring two die formed stainless steel table leaves, which can be positioned independently to help you create the required angle for specific procedures.
